I am a Front-End developer seeking entry level roles. I have been actively working on and building personal projects and websites using technologies like HTML, CSS, Tailwind-CSS, Bootstrap and JavaScript. For a more comprehensive showcase of projects, please visit my [Github profile](#).

PROJECTS

Amet Services

Designed and developed a website for a water and environmental engineering consultant organization as a volunteer using HTML, CSS and JavaScript.

Link to live website: <https://amet.services/>

Quiz Arena

This is a web-app that allows users to store quiz questions along with their options, difficulty and subject. Technologies used include HTML, Tailwind-CSS, JavaScript, PHP and MySQL.

Starlight

Designed a dashboard to manage all your finances, developed with HTML, Tailwind-CSS and JavaScript.

Link to live website: <https://starlight-fin.netlify.app/>

Movie-Freak

This is a web-app that fetches movie data from the OMDB API and displays it to the user. It was built with HTML, CSS and JavaScript.
